

## Quick Reference Guide—Ditching

Start at the top of the Ditch with the blade all the way up.

### 1. Select **Start Survey**

Drive the Ditch in the direction of the flow of the water, follow exactly where you want the ditch to be, all the way to the Outlet

### 2. Select **Stop Survey** at the Ditch Outlet.

3. Select **Auto Disabled** when ready to ditch. This button will change from red to green and say Auto Enable. Now you can start ditching.

← Press the Edit button to edit the design.

## Start Edit Button

**Edit:** This feature will allow you to remove points from the survey line. This will help if you accidentally drove too far or through a hole, etc.

## Editing a Survey Screenshot

*Start Point—touch screen to make point.*

*End Point—touch screen to make point.*

**Save Graph**—Saves a screenshot of graph. (in “Field” folder)

**Zoom and Pan**—Side arrows allow you to zoom to a specific section. Pan by moving your finger while still in contact with the screen.

**Min Grade** – Changes the minimum grade of the ditch

**Max Grade** – Changes the maximum grade of the ditch

**DGL Offset**– Changes the Designed Grade Line Offset. A positive number makes a deeper cut.

**Cancel**—Returns to working screen without saving design

**Reset Graph**—Returns to original design.

**Undo**—Returns design to previous edit.

**Preview**– View proposed edit.

**Done Editing**—Saves new design and returns to working screen.
